RAIL FACILITIES

SIBAY, USSR

Sibay (52-43N 58-40E) is 57 miles southwest of Magnitogorsk at the terminus of a single-track railroad (Route 490A)* serving the copper-mining operations and grain-storage facilities in this area. As shown on the accompanying line drawing, the rail facilities include the following: rail yard, 3,400 feet long, ten tracks wide; holding yard, 1,200 feet long, eight tracks wide; locomotive or car repair shop, 110 by 65 feet, containing three stalls, with connecting shop, 80 by 40 feet; turning wye, effective length 350 feet; and passenger station, 195 by 35 feet.

*Route number is taken from document cited above.
